

# Operational story MrKIT'24

## General

MrKIT has been involved in many group meetings since the beginning of study period 3 of 2024 all the way up to the early weeks of the 2024 summer break. These meetings focused at first mostly about the filling-aspiration and teambuilding. Later meetings focused on planning the best possible Master Reception for the new students of 2024 and deciding how our fatigues (profilering). The following events were decided to be executed for the three first weeks of study period 1 2024, presented in a chronological order:

- 2/9 Run-in with presentation for MasterNollan and a BBQ evening.
- 4/9 Treasure hunt
- 8/9 Island tour of Styrösö.
- 11/9 Lunch lecture by Ericsson.
- 12/9 Viking-themed student dinner party.
- 14/9 A visit to Delsjön for IT- and Data-MasterNollan together with DMNollK.
- 21/9 Formal closing dinner at L's Resto.

During august we had multiple meetings to, among other things, communicate about the first day with the MPAs, plan the events in detail and deciding what main areas each member should do, and send out the information booklet to Master-Nollan.

---

## **A follow-up on some of our goals**

### **Supporting the new Master's students**

We used the anonymous messaging app Signal. This was however not used by the Master's students as they usually wrote to us via Slack or E-Mail. We don't know if it is because we didn't advertise it enough or if they just didn't feel it was necessary to use at any point during the reception.

### **Education**

We all got the suicide-prevention education, however, we never got around to doing the SUS education as we realized we didn't need it for the events we planned.

### **PR**

We saw that some of last year's Master-Nollan wanted an email for the events, so we started doing weekly emails about what events were gonna happen in the coming week. This was greatly appreciated and the preferred way of communication for a majority of the respondents in our post-reception survey.

### **Presence on social media**

This year MrKIT was more active on Instagram, posting about events etc. We also invited every new master's student to Slack so they could get information about their reception from us, but also so they can be informed of other events held for the IT student division.

## Master's reception

During the 2024 master's reception, MrKIT held the following events:

**Run-in, presentation and BBQ evening** During the morning we, together with StyrIT and snIT, visited both MPIDE and MPSOF's start-up and we informed about the coming reception.

In the evening we held a BBQ for Master-Nollan where we grilled vegetarian sausages, held a get-to-know-someone bingo with some music in the background.

**Treasure hunt** We held a treasure hunt with help from ArmIT, Cloudlords, EqualIT, FikIT, Lindholmens makerspace, snIT and StyrIT. This was to let the Master-Nollan get to know some of what the student division life has to give.

**Island tour** We took 30 Master-Nollan to Styrö via the regional ferry and then guided them around a bit of the island. We stopped at a swimming and barbecue area where they could swim as we grilled food for them. FlashIT was with us and shot amazing pictures.

**Lunch Lecture** ArmIT helped us with arranging this lunch lecture.

**Viking-dinner** We held a student dinner party for the Master-Nollan and had Cloud-Lords helping us teach them the dinner party rules and songs. FlashIT were kind enough to photo the occasion for us.

**Delsjön visit** We held a chill hangout at Delsjön together with DMNollK for our and their Master-Nollan.

**Formal closing dinner** We held a formal closing dinner for Master-Nollan at L's Resto, we had also invited FlashIT, StyrIT, MPAs, Staffan and other important people for Master-Nollan.
